

Récit~~a~~l.

Artificial intelligence to save your time

Our company

- An artificial intelligence company dedicated to Natural Language Processing, the science of computers understanding human language.
 - *Natural Language Processing is "TAL" in French...*
 - *...hence the name RéciTAL 😊*
- Research started in 2011
- Company incorporated in 2017

Our team

Frederic Allary
Co-founder, GM, 20 years
in media, publisher, CEO
of data news agency

Gilles Moyse
Co-founder, CEO, PhD,
working in NLP since 2011

Thomas Scialom ESILV,
ENSAE, Polytechnique,
research scientist, former
trader

Melchior de Toldi
UPMC, data scientist

Recital saves your time

“Time is, time was, but time shall be no more.”

JAMES JOYCE, *A Portrait of the Artist as a Young Man*

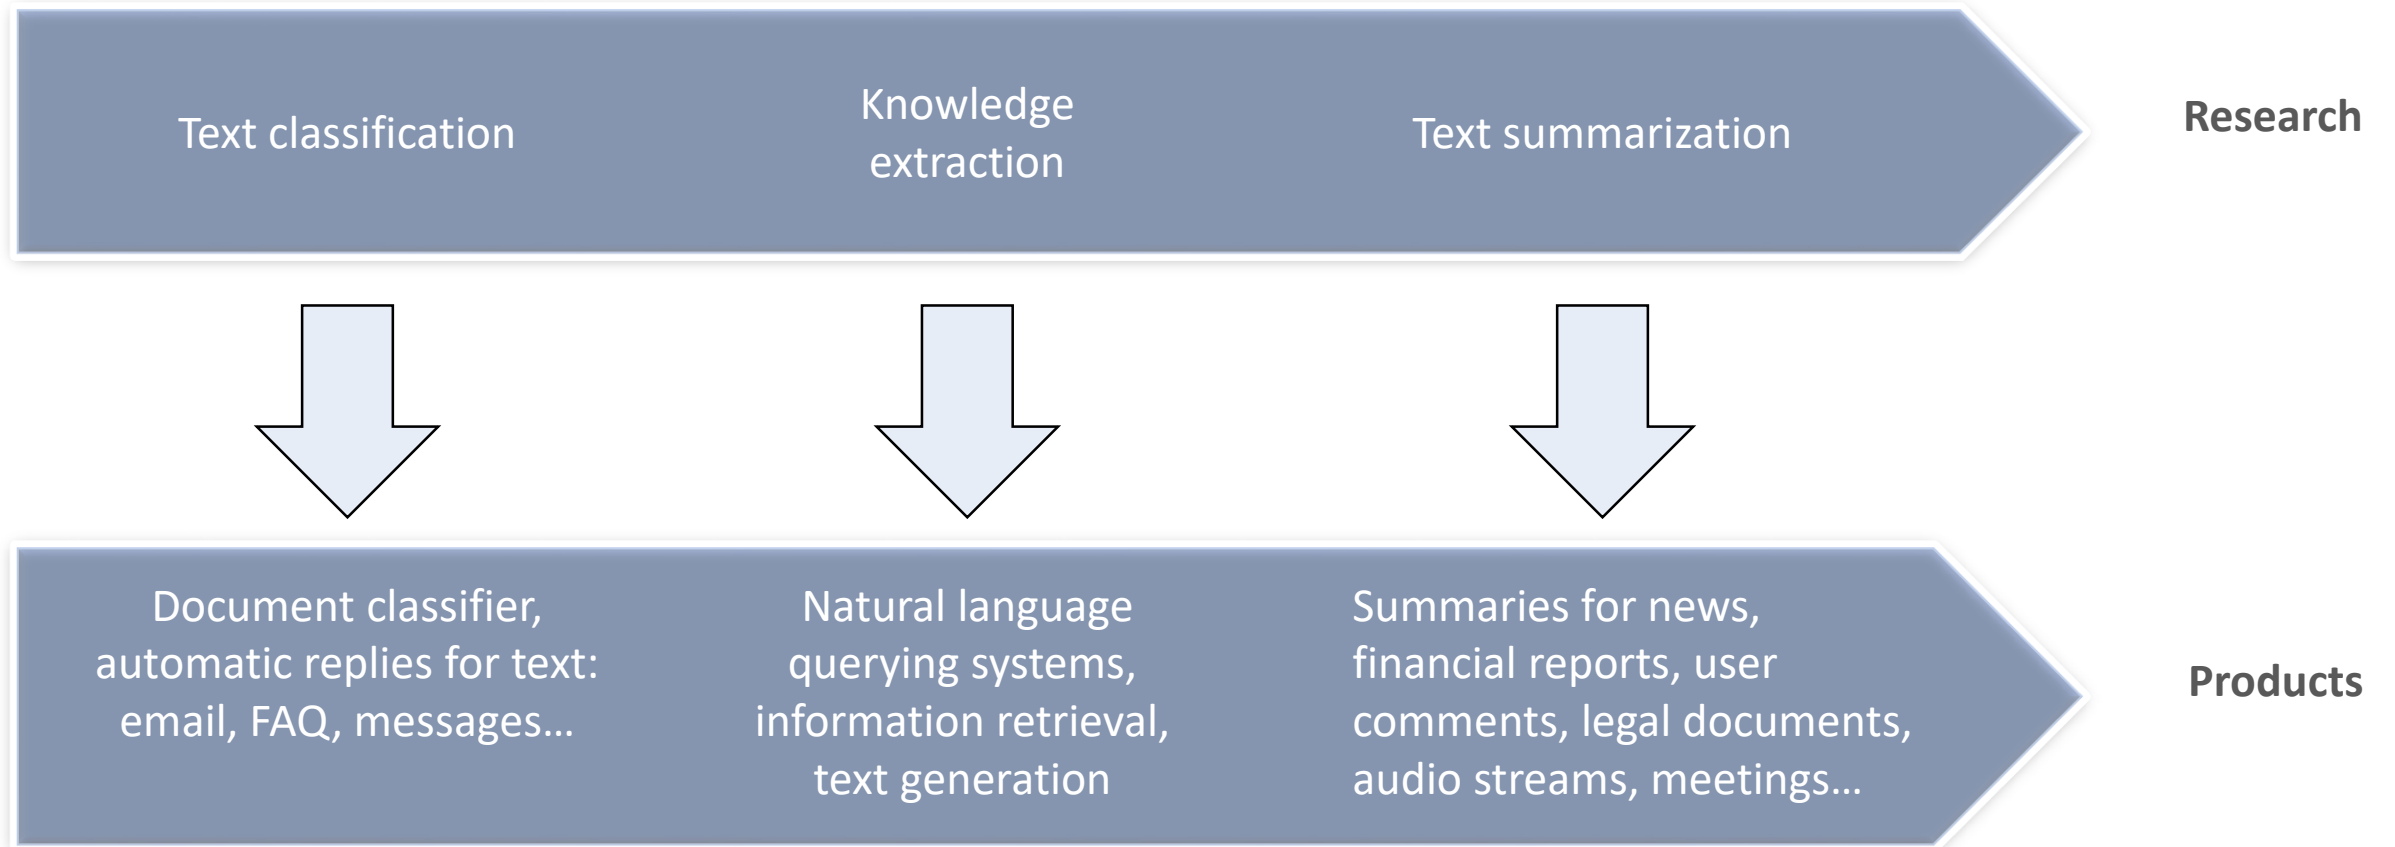

Time is the only really rare thing. People want to have more time, good time.

At **Recital**, we develop **Artificial Intelligence** that can save an incredible amount of time in every industry.

And this is just the beginning...

Our research program

Quieto

Quieto is the Business Assistant designed by Récital.

Its purpose is to provide services that **assist you in your business** doing painful and recurring tasks and **saving time**.

Our first service :

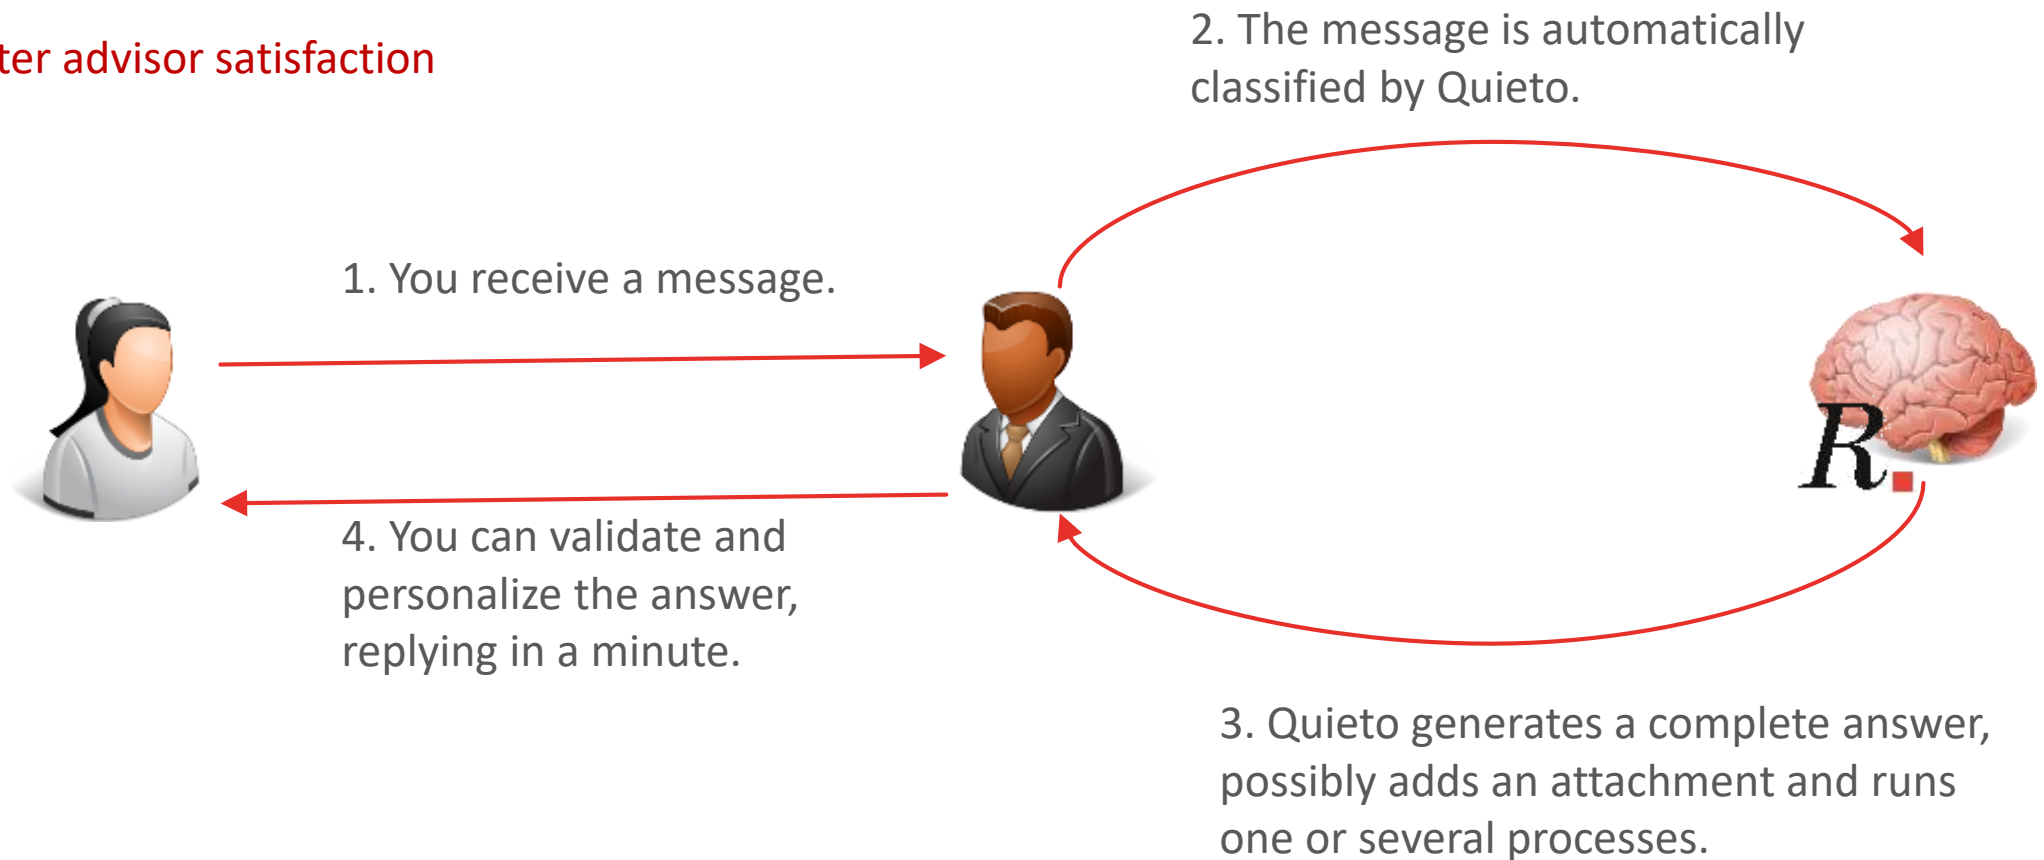

- An intelligent text classifier that understand questions and generate answers
- Can be applied to different fields like FAQ, emails, short messages

Business Cases :

- Internal human resources tools, e.g. employees request for pay slips
- Customer and technical support
- Middle and back office task automation

Quieto prepares answers for you

- Saves time
- Better customer satisfaction
- Better advisor satisfaction

Quieto : a practical exemple

With Quieto: 1 minute

- Read the generated answer
- Send

Without Quieto : 20 minutes

- Check the email
- Analyse the data
- Search for the documents
- Compose a new mail
- Write the mail body
- Add the attachments
- Send

Hello Jane,

Here it is!

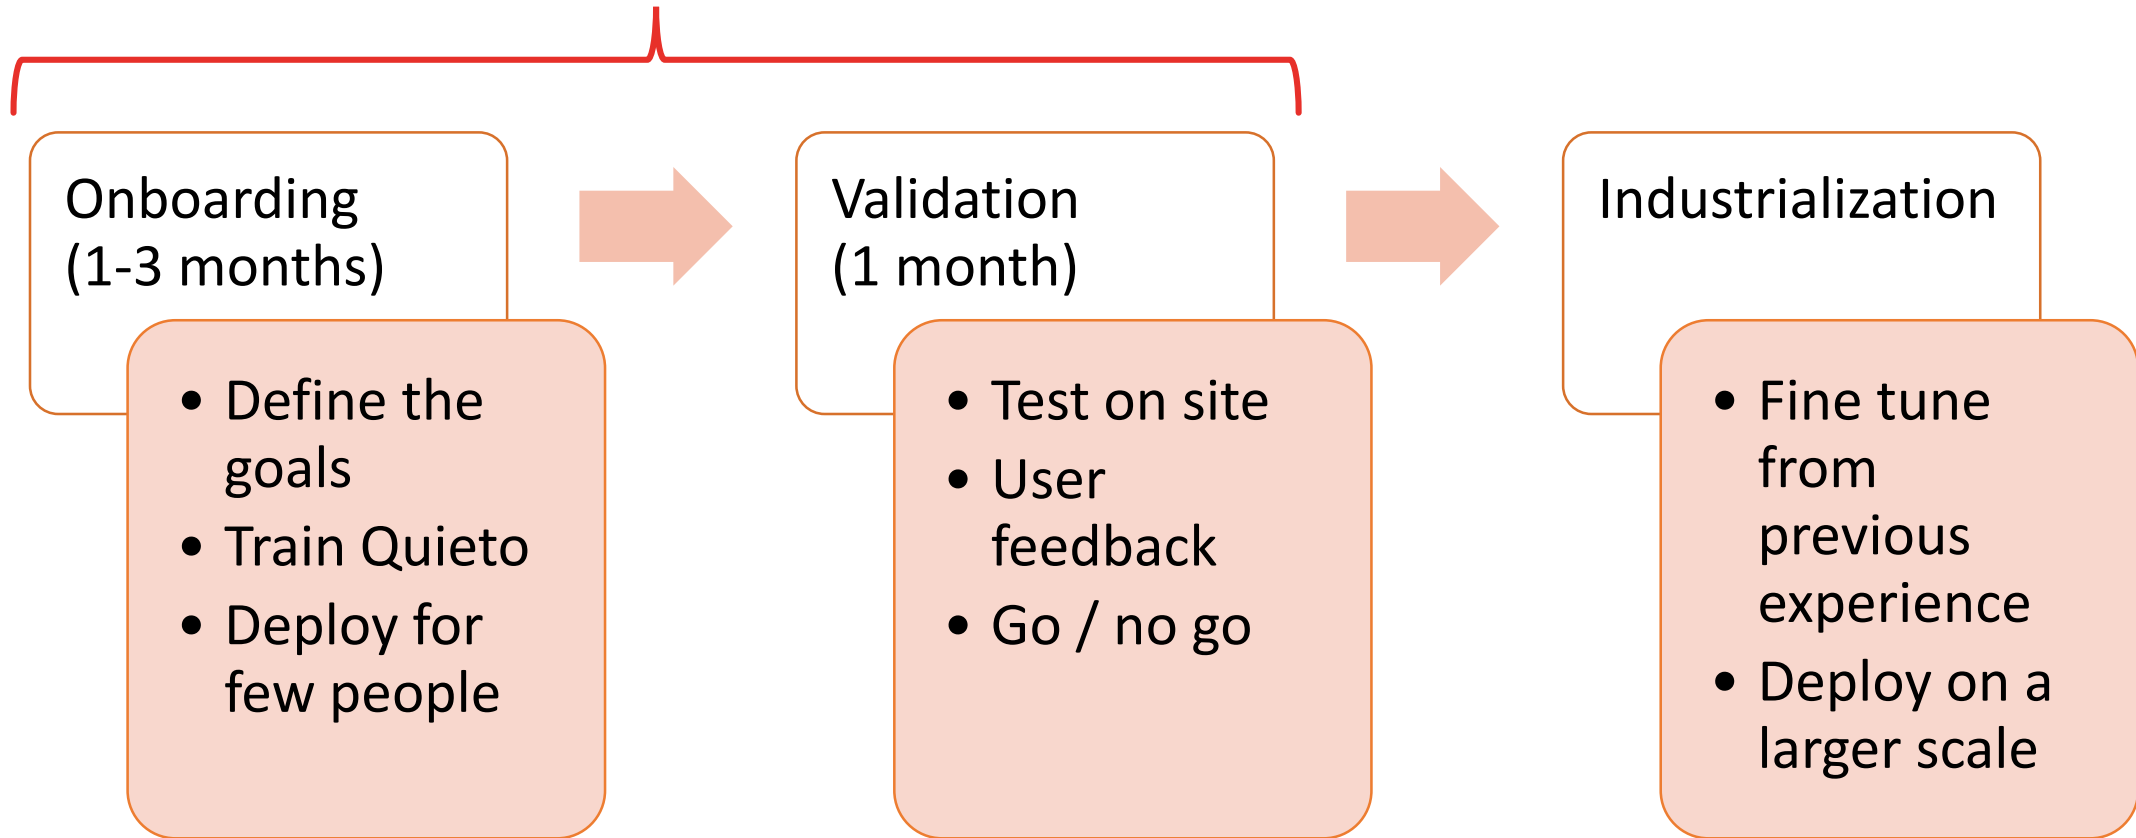

Team

What makes Quieto efficient and unique?

- **End to end process:** Quieto manages the email from its reception to its answer, with attachments if needed
- **Compatibility:** Quieto is independent from the mail client and works with all Outlook versions, Gmail...
- **Personalization:** answers are generated but not sent so the user can personalize them before sending them
- **Usages:** Quieto's classifier may be used for summarization, email tagging, important mail detection...
- **Multi support:** Quieto works with any text: email, FAQ, short messages...
- **Quality:** State of the art NLP to achieve the best result

The typical project

2-4 months POC
